☎ +64 (021) 969 836
≈ New Zealand Citizen

Skills

Programming – Python, C/C++, Golang
Operating Systems – Linux, Windows
Building and Software Pipelines – scripting, Gitlab, Github
IAAS – Kubernetes, AWS, GCP

Personal

I have a passion for complex networking software. From a group of processes exchanging detailed messages on a host to a multi-host backend distributed within an IAAS, to the wide-area control and monitoring of remote devices. These solutions will also integrate with external systems such as databases and expose quality APIs.

Employment

June 2022 - present	Self-employed, Whanganui Implementation of a distributed computing suite Three libraries released on PyPI.org Online relay service supporting WAN messaging (AWS) Product released in May, 2024; https://pypi.org/project/ansar-connect/
Jan. 2015 – May 2022	Vadacom Ltd, Auckland Software engineer Design and implementation of a cloud-based PBX (AWS)
